# SIMPLIFY YOUR EMPLOYEE TRANSPORTATION CHALLENGES WITH EASE

Kingslake*Blue* TMS is an easy to use, accurate and secure end-to-end employee transportation solution which helps you efficiently plan, track and manage transport for your workforce. From the point transport requests are made, you can map out the most efficient routes, track your fleet and employees in real-time, and obtain information on their availability before they arrive.

## Efficient Route Planning

Dynamic route planning with “Visual Planner” suggesting the quickest and most fuel-efficient vehicle routes. Kingslake*Blue* TMS also permits you to customize the types of vehicles and seating capacities available to employees for accurate route planning and resource management.

## Vehicle & Employee Tracking

All vehicles are tracked using GPS and employees onboarding and offboarding off from a vehicle are tracked using NFC or QR codes. Trip histories can be analyzed visually on a map, and also used to efficiently bill transport providers or drivers.

## Automated Cost Calculation

Obtain cost breakdowns for transportation usage by department or individual, simplifying the process of cost allocations.

## Online Transport Requests

Easily submit all your transportation requests via a portal, whether it's for employee transport, visitor arrangements, or shipping goods between locations. Once routes are scheduled, an email is sent as confirmation.

## Local Language Support

The ability to change the language of the system and notifications to the language of your choice helps the drivers and employees to interact with the system with ease.

## Pay as You Use

100% cloud-based solution available on a monthly subscription basis (Pay As You Use). Have access to a hassle-free environment without the burden of hardware cost, licensing hosting and maintenance.

## Dashboards

Access real-time data across multiple areas including vehicle capacity utilization, Co2 emission report, trip history including actual routes taken, monthly transportation costs, and current employee on-board status.

# BENEFITS TO THE MANAGEMENT

- **Cost savings with efficient route planning:** Optimize routes for fuel efficiency, reducing transportation costs.
- **Admin cost savings:** Reduce administrative costs through the digitization of all processes.
- **Subscription-based billing:** Pay only for what you use, without upfront costs.
- **Employee planning:** Efficiently manage resources based on real-time attendance data.
- **Reduction in CO2 emissions:** Reduce carbon footprint with fuel-efficient route suggestions.
- **Cloud-Based:** Access the system from anywhere, at any time.
- **Analytics:** Gain insights into your transportation operations for better decision-making.
- **Employee Security:** Ensure your employee's safety with real-time tracking and emergency support.
